72 DRIVERS

INFORMATION TECHNOLOGY

Systems used

Data exchange with customers takes place using all forms of AS2, FTP, SFTP, FTPS, Webservice protocols, where you can manage information using different formats: EDIFACT, SAP IDOC, FLAT FILE, XML. In some cases (when internal policies do not allow connection with external systems), the connection takes place directly on the customer systems (SAP).

All business applications reside in two Data Centres: the primary one located in Lombardy and the secondary one located in Tuscany, used for disaster recovery procedures.

The data availability and integrity check are carried out by internal staff to ensure maximum security.

The applications are developed internally and we can customise the procedures to customer requests.

All locations are connected via fibre connections and are backed up over a radio bridge. While all platforms are equipped with wi-fi coverage for the use of portable terminals.

WMS used: Stock System, On Going

TMS used: Sherpa

CERTIFICATIONS & ENVIRONMENT

Our efforts

We are committed to reducing our own impact on the environment by contributing to the preservation of natural resources.

Every year we monitor the electricity, water and gas consumption of each operating site to intercept any anomalies and waste through a comparison of consumption. Thanks to the detection of critical areas, we have implemented improvement strategies for our company fleet that have been made sustainable with natural gas-powered vehicles. In addition, paper-based document management has today been minimised and replaced by a more functional and efficient intranet. We ensure responsible and careful quality management that protects our employees and customers. We ensure responsible and careful quality management that protects our employees and customers.

DATA CENTER

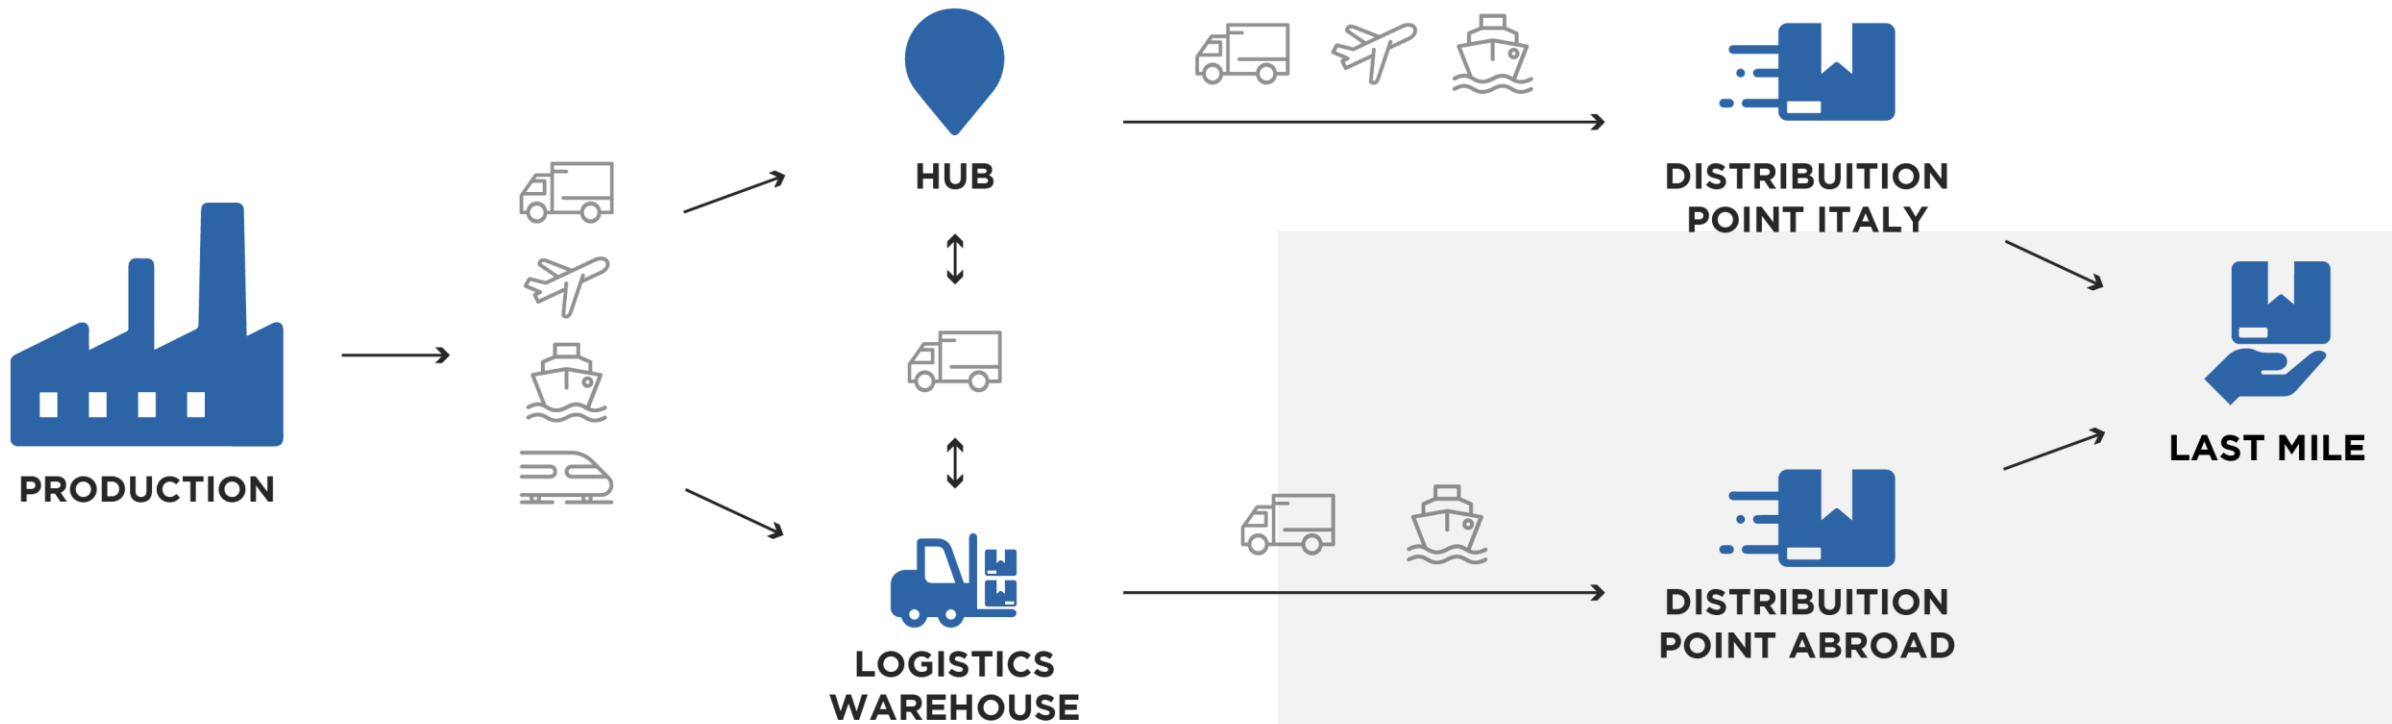

Our efforts

To reduce the environmental impact, Züst Ambrosetti has decided to use only suppliers that follow the guidelines defined by the European Commission for the management of data center and for the management of its information systems.

SUPPLY CHAIN

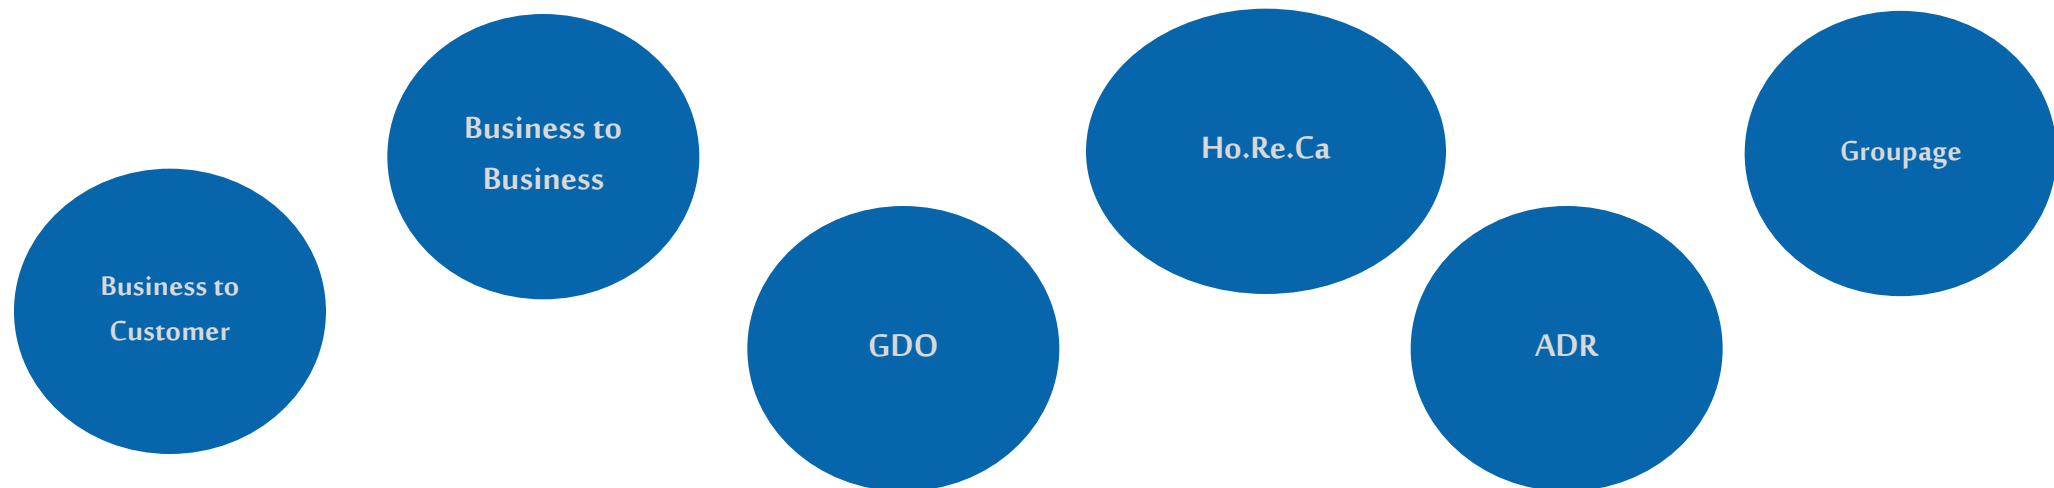

TRANSPORT

NATIONAL DOMESTIC TRANSPORT

Every day, from 6 hubs, more than 80 direct lines to the 55 distribution points located throughout the country.

Thanks to an advanced web monitoring system, we control transport in real time, ensuring maximum efficiency and safety.

The capillarity of the network ensures the daily coverage of all national areas, with a specific specialization for the optimal management of transport related to the areas:

NATIONAL TRANSPORT

SINTECO LOGISTICS

About Sinteco Logistics

For over **40 years** in integrated logistics with a focus on chemical management.

The headquarters in San Giuliano Milanese is a strategic point for the organization and management of shipments, in particular for those dedicated to substances commonly considered dangerous.

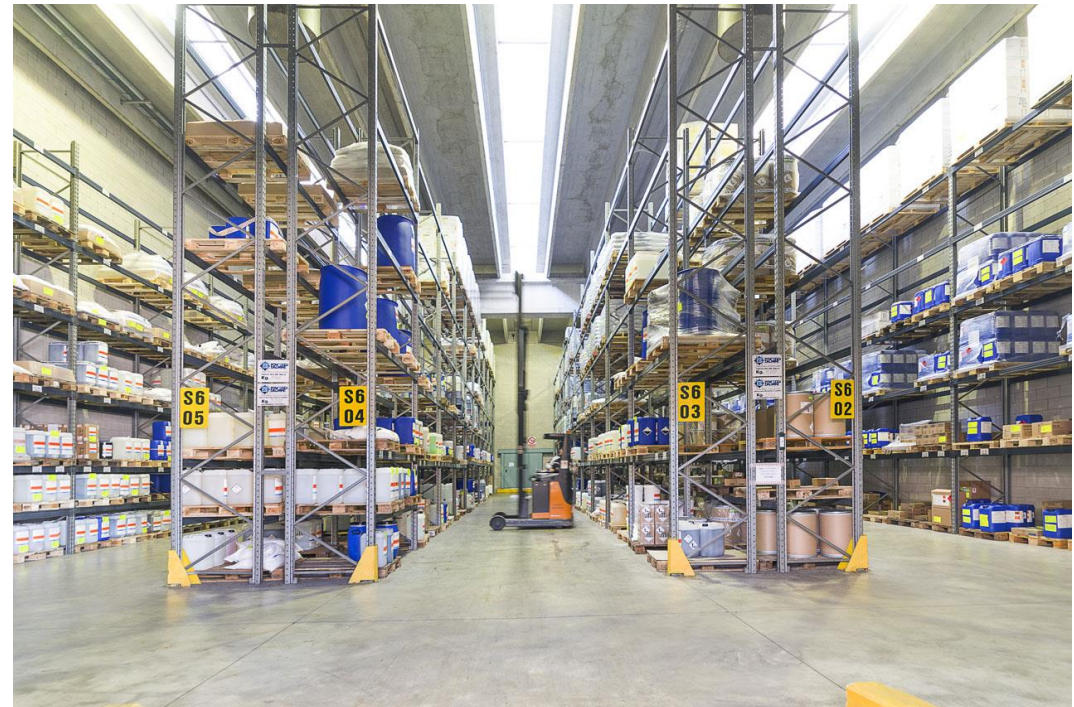

The acquisition of Sinteco Logistics by the Group represents a further step forward in the performance and services offered.

SERVICES

- Authorisations and permissions for different types of chemicals (Seveso Act)
- Food and zootechnical storage authorisations
- Good Distribution Practice (Pharma Products)
- VAT and Customs warehouse
- Simplified customs procedure
- Excise Authorization (Oils, Petrol, Alcohols, Energy products)
- High level of Safety and Security
- T- and RH-controlled areas
- Authorisation re-labelling plant protection products
- Certified VGM procedure (second method)
- Waste Disposal Management

SEVESO WAREHOUSES

Tiesse has 90,000 square meters of warehouses authorised under the Seveso Directive, lower and upper threshold. Recently built, they represent the solution to the storage problems of classified chemicals.

We can offer a number of warehouses for chemical products in Veneto, Lazio, Puglia and Sicilia regions. The warehouses are directly connected to Tiesse Group IT system.

VALUE ADDED SERVICE:

- Labelling . Relabelling
- Painting mixing machine
- Waste management

LOGISTICS WAREHOUSES

The innovative and highly technological systems of our offices ensure safe and optimal storage, in compliance with the permits granted.

The 3 Sinteco Logistics locations through the more than 35 compartmentalized warehouses offer a complete and excellent service, following step by step all stages of the supply chain.

CUSTOMS & TAX WAREHOUSES

The Group has private customs warehouses covering 50,000 square meters with Tax deposits for VAT purposes combined with import-export, storage and distribution activities.

These tools are an added value to our service: higher quality, profitability and qualified assistance in the customs field.

OUR STRENGTHS

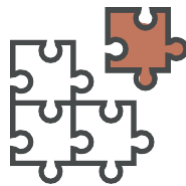

DISTRIBUTION

Tiesse SPA distribution network is directly controlled and allows customer to track his order throughout the distribution process, making the service unique in the integrated logistics sector.

TRAINING

Training is the starting point for having professionally trained, highly motivated and customer-oriented personnel in the company.

CUSTOMER SERVICE

Customer service is the beating heart of the service and for Tiesse SPA it is always dedicated. Our staff is highly qualified, responsive and flexible in solving problems.

OUR STERNNGTHS

INSURANCE

Thanks to the internal insurance office, in collaboration with leading national and international companies, Tiesse Group is able to provide a tailor-made insurance service.

EXCISE SERVICE

Thanks to the tax deposits for products subject to excise duty in the warehouses of Landriano and Pavia and Massalengo, we treat goods subject to excise duties such as lubricating oils, alcoholic products, energy products, alcoholic flavorings.

CUSTOMS SERVICES

Private bonded warehouses with tax warehouses for VAT purposes combined with import-export, storage and distribution activities are an added value and allow new logistic models in terms of quality and profitability.

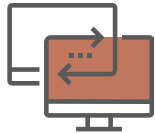

OUR STRENGTHS

INTEGRATED MANAGEMENT SYSTEM

Our integrated management system ensures the necessary attention to aspects such as quality, safety and the environment.

INTERNAL TECHNICAL OFFICE

Thanks to our internal technical office we are able to guarantee maximum support for storage and freight transport activities
